

HARIKA GOLUSU

B.Tech — CSE (AI & ML) · Prompt Engineering & LLM Systems
golusuharika@gmail.com | +91 6281853895 | Andhra Pradesh

SUMMARY

Final-year AI & ML student passionate about prompt engineering, LLM evaluation, and building intelligent AI systems. Experienced in RAG pipelines, semantic retrieval, prompt optimization, and cloud-based AI deployment. Hands-on experience with LangChain, vector databases, embeddings, and structured prompting workflows. Strong foundation in Python, reasoning systems, and modern Generative AI frameworks.

EDUCATION

B.Tech — Computer Science & Engineering (AI & ML)

Aditya Institute of Technology and Management, Tekkali | JNTUGV | 2023 – 2026 | CGPA: 9.16

INTERNSHIP

Cloud & AI Intern · SmartBridge · May 2025 – July 2025

- Worked with AWS services including EC2, S3, IAM, CloudWatch, and DynamoDB through hands-on labs and deployments.
- Built scalable cloud-integrated AI workflows and strengthened understanding of deployment, monitoring, and infrastructure optimization.
- Collaborated on cloud-based AI applications and automated notification systems using AWS services.

PROJECTS

AI Research Assistant – RAG Based Multi PDF Conversational System · 2026

- Engineered a RAG-based AI assistant using LangChain, Google Gemini, FAISS, and FastAPI for intelligent multi-document retrieval and conversational AI.
- Implemented embeddings, semantic search, prompt optimization, retrieval control, and context-aware response generation.
- Built structured prompting workflows focused on hallucination reduction, response consistency, and token-efficient retrieval.
- Stack: Python, LangChain, Gemini API, FastAPI, FAISS, Vector Embeddings.

LLM Prompt Evaluation & Optimization Study · 2026

- Conducted prompt evaluation experiments by testing temperature, prompt structures, max tokens, and retrieval configurations across different LLM workflows.
- Measured output quality using consistency analysis, hallucination reduction techniques, and structured JSON response validation.
- Maintained reusable prompt templates and experiment tracking workflows for production-oriented AI systems.
- Stack: Python, OpenAI API, Gemini API, LangChain, Jupyter Notebook.

DeepShield – Hybrid Deepfake Detection System · 2025

- Built a real-time deepfake detection system using ResNeXt CNN and LSTM for spatio-temporal video analysis.
- Processed and analyzed 6000+ videos with optimized preprocessing pipelines and confidence-based prediction workflows.
- Developed a Django-based web application for real-time inference and AI-powered classification.
- Stack: Python, OpenCV, PyTorch, TensorFlow, Django.

SKILLS

LLMs: GPT-4, Gemini, Claude, LLaMA, Mistral

Prompting: System Prompts, Few-shot Prompting, Chain-of-Thought, Guardrails, JSON-mode

NLP & RAG: LangChain, FAISS, Embeddings, Semantic Search, Vector Databases, Retrieval Pipelines

Languages: Python, Java, HTML, CSS

Cloud: AWS (EC2, S3, IAM, DynamoDB, CloudWatch)

Tools: Git, VS Code, Jupyter Notebook, Postman, Google Colab

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified Cloud Practitioner — 2025
- OCI AI Foundations Associate — 2025

LEADERSHIP & ACHIEVEMENTS

- Public Outreach Lead — Google Developer Groups (GDG), AITAM
- Google Student Ambassador — Gemini AI
- Winner — Research Conclave 2026, R&D; Cell AITAM
